CASE STUDY · PRODUCE TRADING

THE MARKET REPORTS NOW READ THEMSELVES.

How we automated the back office of a fresh-produce trader, from the morning reports to what goes on the next truck.

THE PROBLEM

STACKS OF PDFS. EVERY DAY.

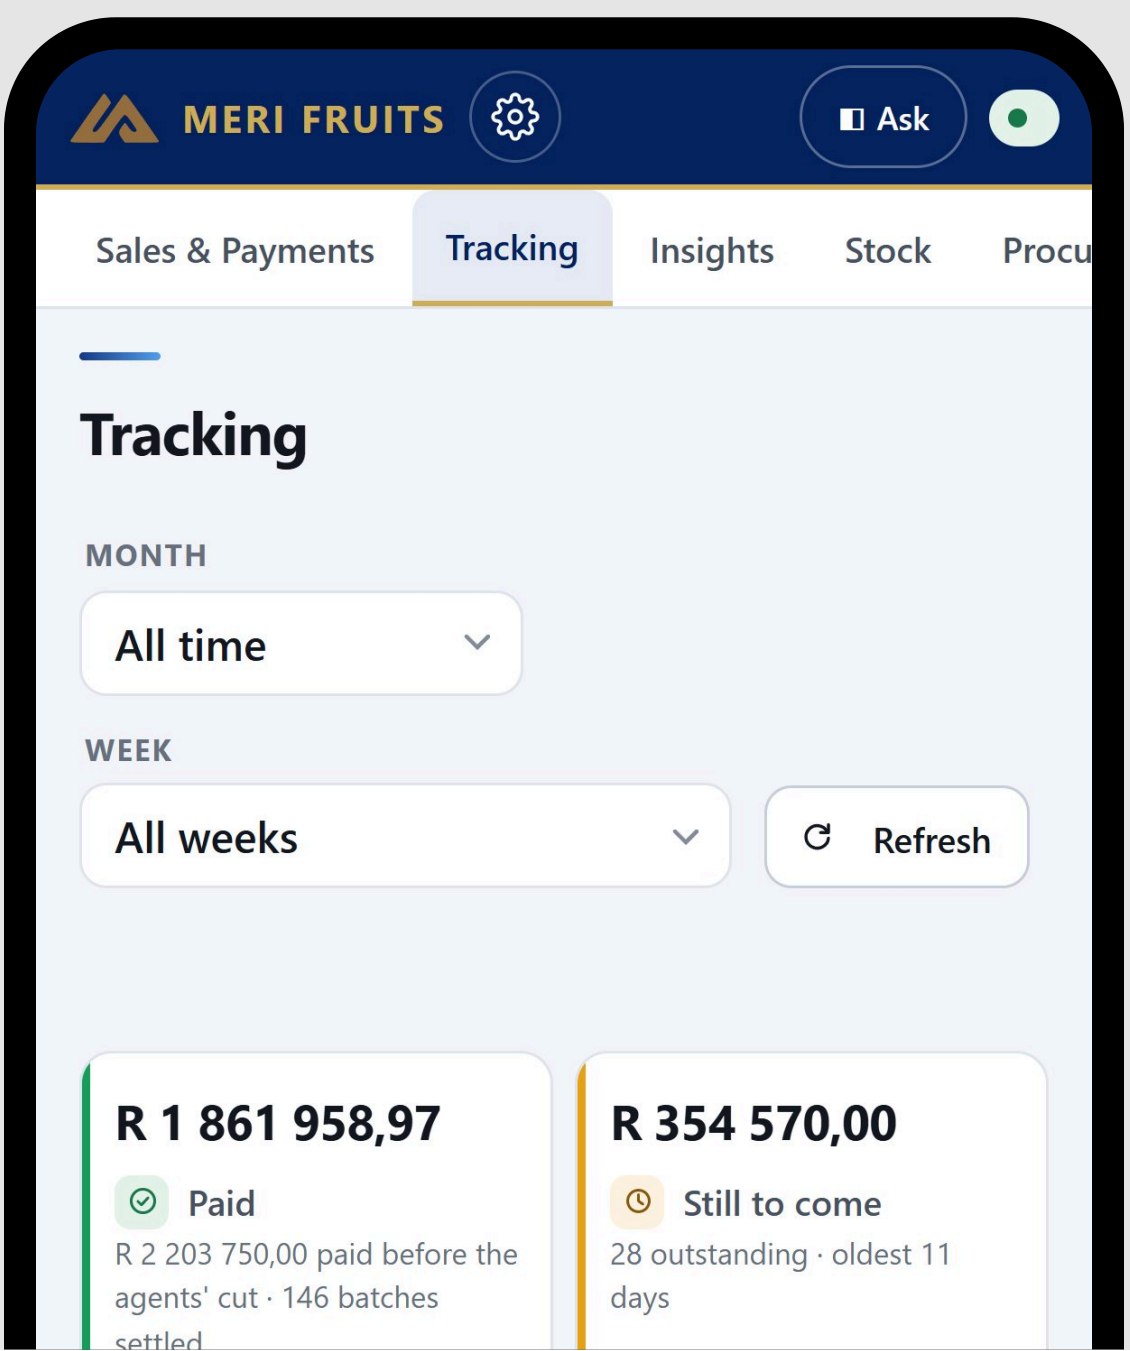

The trader's market agents report back in fixed-format PDFs. Someone had to turn them into numbers the business could use.

- × Every report read and typed in by hand
- × Every payment matched to its sales by hand
- × Stock on the market floor that nobody had reported yet

WHAT WE BUILT · 01

REPORTS PULL THEMSELVES, EVERY MORNING.

An agent pulls yesterday's sales and payments from the market portal and reads them. No retyping.

WHAT WE BUILT · 02

EVERY PAYMENT MATCHED. TO THE CENT.

Payments reconciled against deliveries, with anything unusual flagged for a person to ask about.
